

*Fueling Your Progress, Efficiently, 24-7*

## Safety Certification

We have attached our **Fire Safety Training – Safe Fueling Guidelines for Non-Retail Facilities** for your review.

This brochure covers important actions and guidelines to follow when you use a cardlock facility. It is required, by the State Fire Marshall, that we have a signed acknowledgement that this training has been completed with all cardlock users within your company.

Please review the attached brochure with all cardlock users for your company, and complete the acknowledgment below to indicate this has been completed.
